Gentlemen -

When Delta Airlines emerged from bankruptcy they were allowed to eliminate my retirement plan by assigning it to the PBGC. The PBGC then reduced my pension by 85% because I retired prior to the normal retirement age of 65, even though as an airline pilot I was required to do so by the FAA regulation mandating retirement at age 60. The DOL and EBSA were no help in any of these transactions.

Eliminating my ability to trade options in my IRA would be no help now. I have been successful in selling covered calls and cash secured puts in my IRA. Since I do not have enough years left to wait for my stocks to appreciate this is the best way I have found to replace some of this lost revenue.

Thank you for the opportunity to register a comment, Richard Kauffmann
