**Subject:** Denial of contraceptive coverage  
**Date:** Wednesday, August 10, 2011 7:33:12 PM

---

Women should not be denied contraceptive services because their employer has a belief against such coverage. A woman's right to contraceptive services should not be dictated by someone else. Contraceptives are not being forced upon any one. Some want to force the lack of contraceptives on others.

This is a health issue. Free contraceptives will help women control their lives and improve the lives of their family members.
