To Whom It May Concern:I am a woman--my health issues are important to me and all women!!Thank you Secretary Sebelius for including health insurance coverage for women as a part of the Health Reform bill!! Viagra is good for the good old boys--but women are to have no coverage:: The clergy of America have no business in a woman's womb or underware!!Coverage for drugs, for healthy pregnancy---total medical care for women is important::If one does not want the coverage then get a health policy that has no gyne care!!Conscience is a personal property--decisions are made between a woman, her doctor, family and God::Not out side gossips!! Sincerely, Alice in Pittsburgh

Sincerely,  
Alice McGee
