General Comment

Please do not change this rule to further cater to those demanding religious exemptions from doing their jobs. Religion is never an acceptable grounds for denying legal medical care to those who need it. Accessible, affordable, safe contraception is one of the best preventative-care measures any insurer can provide, and like other forms of health care, it is a human right. Do not allow the good work you have done to be nullified by individuals who wish to impose their idea of 'morality' on others.
