Re: Section 2713 of the Public Health Service Act as amended by the Affordable Care Act My comment is on the requirement to provide EOB's for USPTF services graded A or B

Many such services are confidential. The USPTF rand this Act require that such services be provided to recipients free of charge. Providing a EOB removes the ability to provide this service confidentially.

As per the American Academy Of Pediatrics and the Society for Adolescent Medicine and Health, both of which I am a member, I would suggest the following:

Options for addressing the EOB barrier to confidential services for adolescents and young adults include:

- Eliminating the requirement to issue EOBs for all USPSTF recommended A and B
  preventive services. Given the provision in the health reform law that requires USPSTF
  A and B clinical preventive services to be offered at no cost to the patient or policy
  holder, EOBs for the provision of these services are unnecessary.
- Excluding chlamydia screening and other sensitive preventive services from EOB
  documents. Health plans can inform policy holders in their annual policy statement that
  in an effort to uphold confidentiality, information about certain sensitive services will
  not be included in an EOB.
- Providing a simple procedure for healthcare providers to request that no EOB is issued
  to policy holders for sensitive services. Health plans can allow health care providers to
  request an exemption from the requirement to send an EOB to the policy holder when
  billing for sensitive services.
- Providing an EOB stating general medical services were rendered, but not providing specific details and thereby helping protect confidentiality.
