General Comment

This is backwards thinking not forward thinking. I urge you to respect the rights of these institutions to invest their employees money in ways that benefit both the environment and social justice issues. This attempt to discourage/limit their ability to act in a way that reflects the values of the people whose money is being invested, runs counter to stated republican goals of reducing regulation and increasing freedom of choice and as such seems like a blatant pandering to energy companies who are being slow to get with the times.

Do not pass this rule-making!
