## General Comment

Greetings,

I am writing on behalf of myself, a concerned citizen with an interest in ESG-based investing. The Proposed Rule would make it more difficult for plan providers and Fiduciaries to offer choices, and reduces investment options. The Proposed Rule reads as a thinly veiled ruse to slow the transfer of capital out of certain established industries and into new ones.

I emphatically advise against adding hurdles to ESG-based investing.

Sincerely,  
Robert Furber
