Financial Factors in Selecting Plan Investments

Document: EBSA-2020-0004-DRAFT-1373
Comment on FR Doc # 2020-13705

Submitter Information

Name: H Bodie

General Comment

I would like to support the proposed Rule being presented by the Department of Labor (or Executive Order 13771) which will amend the Employee Retirement Income Security Act of 1974 Title 1. The goal of the proposed amendment will help clarify the roll of those in charge of our retirement investment accounts. They should be investing in a way that never subordinates the interests of the plan participants and beneficiaries in their retirement income to non-pecuniary goals. They should always seek to protect the interests of all private pension holders. They should never sacrifice investment returns, take on additional investment risk or pay higher fees to promote non-pecuniary benefits or goals. Please protect the interests of all private pension holders!
