General Comment

Stop messing with our investments. We took the risks and there is no reason that the federal government should take our profits. When we made poor investment choices...the federal government did not share our losses. We do not want to invest in 'woke' companies any more than we want to invest in 'green energy' companies. Climate is always changing and it has nothing to do with mankind. Our world is greener because of mankind's use of fossil fuels. Man caused climate change is a deliberate misdirect. Volcanic activity puts more pollutants in the atmosphere than man.
