## General Comment

Federal Registrar John smith,

We all need a retirement savings. The Department of Labor to revise and fix the Trump-era rules that protect unsustainable industries by making it more difficult for retirement plan managers to take into account the real world impact of their investments on the climate, working conditions, or racial equity, as well as the major economic risks associated with these investments.

As workers, we need a say too! We must have retirement plans that takes into account how individual companies support and are financed with our lifelong and hard earned savings.
