General Comment

Federal Registrar John smith,

The Trump era rules discourage sustainable investing and make it more likely that retirement plans will invest in unsustainable industries that produce lower returns and harm workers and the planet, even while high performing, sustainable investment options are readily available.

The Department of Labor's new rules must ensure that workers' and retirees' savings can be invested in safe and sustainable ways that help lower climate risk and promote fair working conditions and racial equity. And they must encourage retirement plans to consider these economically relevant factors when investing on behalf of their participants.

But with financial reform we can get covered by factories. Company. Industries and other department even after retirement as due to immigration circumstances and broken system we have to fix tax department as well.

It effect all individual under the laws that is not maintained all rules that applied under tax reform and immigration reform both in India and in foreign countries..

We have to keep all record of all individual employees and employer on given job opportunities and responsibilities under fair work ombudsman in India and in all developed countries.

Gurjeet Kaur
