General Comment

Federal Registrar John smith,

As a worker with a retirement account, I would vastly prefer to have a retirement plan invested in sustainable companies. All workers' and retirees' savings should be able to be invested in safe and sustainable ways that promote healthy returns, a healthy economy, and a healthy society and planet. That means ensuring that the updated rules fully reverse the Trump-era rules by eliminating all prohibitions and burdens that discourage retirement plans from considering workplace safety, climate impact, racial equity and other conditions that affect the long-term sustainability of the business.
