General Comment

Federal Registrar John smith,

Trump-era rules create obstacles for retirement plan managers to take into account the impact of their investments on the climate, working conditions, or racial equity--as well as the major economic risks associated with these investments. In effect, this results in protecting unsustainable industries. I'm counting on the Department of Labor to follow through with this revision.

As an IRA holder, I have struggled to invest in ways that match my values. Workers and their retirement plans should have the right to take the big picture into account regarding which companies they support and finance with their hard earned savings.
