General Comment

Before I retired in 2011 from the USEPA, for EPA I worked internationally for 17 years and around the world saw climate change beginning to do damage. Now, 11 years on in 2022, the damage is constant and occurring in many places also in the USA. It would be shameful for the TSP not to divest from fossil fuels and the banks and ins. cos. that continue to fund their filth causing an existential threat to life on earth.
