General Comment

Naked shorting is bad, There are many bad actors on wallstreet doing bustouts, naked shorting, saying a company has bad aspects when they don't etc. These companies conspire with amazon, Bain capital and others to remove Toy's r us, KB toys, Blockbuster and more. I suggest starting with, A house of cards 1,2,3, A castle of glass, Where are the shares, Citadel has no clothes, The everything short, Blackrock bagholders, Citadel has hostages, The Chaos Theroy, Walking/talking like a duck, The smoking gun, Finkle is einhorn and more at GME.FYI

All the DD needs to be read OUTLOUD to members of the committee and those bad actors need to be punished not it's just business and pay a min fine that does not outweigh the revenue coming in. It's effecting many families and lives. Here is the attached evidence of how they the bad actors are manipulating the markets. The market crash of 2008 never finished. It was can-kicked and the same people who caused the crash have still been running ramp and doing the same ██████ in the derivatives market as that market continues to be unregulated. They're profiting of short-term gains at the risk of killing their institutions and potentially the global

economy. Only this time it is much, much worse. The bankers abused smaller amounts of leverage for the 2008 bubble and have since abused much higher amounts of leverage - creating an even larger speculative bubble. Not just in the stock market and derivatives market, but also in the crypto market, upwards of 100x leverage. COVID came in and rocked the economy to the point where the Fed is now pinned between a rock and a hard place. In order to buy more time, the government triggered a flurry of protective measures, such as mortgage forbearance, expiring end of Q2 on June 30th, 2021, and SLR exemptions, which expired March 31, 2021. These bad actors once you see what they have done should go to jail DO not pass go DO not collect 2 BILLION dollars. Even if only 10% is true.... This is scary stuff at GME.FYI
