General Comment

I object to the efforts underway to make it hard for me to retire! I object to the Department of Labor enacting regulations that would restrict how I use my own money for my retirement. The administration believes you I am not smart enough to plan for my retirement. They are wrong. This is the epitome of the progressive nanny state mentality.

I object to those with their progressive ideology wanting to control what I eat, how much I make, my health care, and NOW my retirement. I have invested in a 401K and an IRA, I will be affected!

Please accept and record my comments in opposition to the administrations efforts. I worked hard for what I have earned and harder still to save and grow my nest egg. DOL; understand this I you can plan for my own retirement.

Keep your grubby mitts off my retirement money. It is mine. It is not yours. Do not help me. I am perfectly capable of handling my affairs by myself without your assistance. I do not need you to controlling my retirement. Ive spent my life working towards my retirement. A government bureaucrat should not get in the way of that. Stop will do whatever is necessary to stop DOL from restricting my retirement. This is me voicing my concern. "Im smart enough to plan for my own retirement!"
