Employee Benefits Security Administration U.S. Department of Labor,

Conflicts of interest in retirement advice cost American families \$17 billion each year. Eliminating the fiduciary rule would allow Wall Street firms to take advantage of working people by giving financial advice that benefits the firms rather than their clients. I urge you to implement the rule, which will protect me and other current and future retirees from financial advisers who put their own interests ahead of ours. Why is it okay for Wall Street to rape the coffers of Americans over and over. Not one of the Wall Street bankers is in jail for the bogus derivatives they packaged and sold as triple A rated bonds. They colluded with Moodys, and groups like Moodys to fraudulently defraud the American people and people around the world. We need the fiduciary rule to protect us from the predators of Wall Street who continually manipulate the market with their bogus offers to buy stock and putting millions of entries in and get the stock price to rise whilst never buying the stock. The game is set up for Wall Street to win every time and it is time to protect Americans and especially seniors. You have allowed Wall Street and banks to rob Americans since the 1929 Crash, McCain and John Glenn, Keating and the Savings and Loan debacle, and 2008 heist of our money. It is about time you do the right thing and protect us.
