## **General Comment**

I wish to comment on the proposal to disallow option trading in my IRA brokerage. I use the options to generate income and have done very well.I have supplemented my retirement income quite well with the option writing and some buying and selling.

I have been doing this for about 20 years and I would be severely handicapped in my normal distributions from my IRA if this financial option was not allowed. I pay my taxes and try to live off the additional income I generate writing these contracts.

Thank you
