

NFJP Data Validation Software Version 2.0

NFJP Data Validation Software Version 2.0 is now available. NFJP grantees can use version 2.0 with the PY 2006 Quarter 3 WIASPR to conduct data element validation for PY 2005 exiters, and to analyze exiter performance.

NFJPDV 2.0 incorporates the following changes from version 1.2:

- Updated record layout to conform to the new WIASPR.
- Updated edit checks for the new record layout.
- Updated performance outcome groups and performance measure calculations for common measures and the optional six-month earnings measure.
- Updated list of data elements to be validated based on the new record layout and common measures.

If you have any questions regarding the software, its installation, its use, or the validation methodology, please e-mail NFJPTA@Mathematica-MPR.com.
