

**Federal Interagency Coordinating Council on Access and Mobility**

**Coordinated Human Service Transportation Planning**

**FINAL POLICY STATEMENT**

**October 1, 2006**

**Policy Statement**

Consistent with the requirements of the Executive Order and the statutory creation of a locally-developed, coordinated public transit human service transportation planning process established in the Safe, Affordable, Flexible, Efficient, Transportation Equity Act-A Legacy for Users (SAFETEA-LU), members of the Federal Interagency Coordinating Council on Access and Mobility (CCAM) adopt the following policy statement:

“Member agencies of the Federal Coordinating Council on Access and Mobility resolve that federally-assisted grantees that have significant involvement in providing resources and engage in transportation delivery should participate in a local coordinated human services transportation planning process and develop plans to achieve the objectives to reduce duplication, increase service efficiency and expand access for the transportation-disadvantaged populations as stated in Executive Order 13330.”

NOTE: Significant involvement is defined as providing, contracting for and/or subsidizing individual transportation trips for individuals with disabilities, older adults, or people with lower incomes.

**Background**

Presidential Executive Order 13330 on the Coordination of Human Service Programs issued by the President on February 24, 2004, creates an interdepartmental Federal Council on Access and Mobility to undertake collective and individual departmental actions to reduce duplication among federally-funded human service transportation services, increase the efficient delivery of such services and expand transportation access for older individuals, persons with disabilities, persons with low-income, children and other disadvantaged populations within their own communities.

As a first principle to achieve these goals, federally-assisted grantees involved in providing and funding human service transportation need to plan collaboratively to more comprehensively address the needs of the populations served by various Federal programs. In their report to the President on the Human Service Transportation Coordination, members of the Council recommended that “in order to effectively promote the development and delivery of coordinated transportation services, the Administration seek mechanisms (statutory, regulatory, or administrative) to require participation in a community transportation planning process for human service transportation programs.

In August 2005, the President signed legislation consistent with this recommendation to reauthorize Federal public transportation and Federal highway programs that contained provisions to establish a coordinated human services transportation planning process. This legislation, the Safe, Affordable, Flexible, Efficient Transportation Equity Act, A Legacy for Users (SAFETEA-LU), created a requirement that a locally-developed, coordinated public transit/human service planning process and an initial plan be developed by 2007 as a condition of receiving funding for certain programs directed at meeting the needs of older individuals, persons with disabilities and low-income persons. The plan must be developed through a process that includes representatives of public, private and non-profit transportation providers and public, private and non-profit human service providers and participation by the public. Complete plans, including coordination with the full range of existing human service transportation providers, are required by Fiscal Year 2008

### **Implementation**

Members of the Federal Council on Access and Mobility will undertake actions within six months of Council adoption to accomplish Federal program grantee participation in locally-developed, coordinated public transit/human service coordinated planning processes.
