

Growth Opportunities – Project Summaries

The Employment and Training Agency's (ETA) Growth Opportunities (GO) grant initiative supports the placement of youth (15-18) and young adults (18-24) with school expulsion or justice system contact who exhibit risk-factors associated with delinquent or criminal activity into paid work experiences aligned with their career and educational goals. It also provides funding for services such as mentorship, legal assistance, and transportation that support participants' participation and success. The goals of the grant include:

- Help youth avoid violence and build conflict resolution skills.
- Introduce and prepare youth for the world of work.
- Help youth identify career interests and attain skills and good work habits.
- Provide income to youth to start them on the path of earning living wages.

Justice-involved youth and young adults will be prepared for and introduced to the world of work through placement into paid work experiences. In addition, the program encompasses occupational education and training in in-demand industries, leadership development, mentorship, and post-program placement into employment and/or education. These grants focus on youth and young adults most impacted by and associated with community violence, particularly in areas of concentrated crime, poverty, and significant recent community unrest.

GO grantees have a violence prevention partner with significant experience in outreach to individuals with a high risk of committing violence (and/or becoming a victim) to interrupt the cycle of violence. Grantees also have a regional or local justice system partner that collaborates with the violence prevention partner.

Eligible participants:

- Are at least 15 years old and not older than 24 years of age on the date of enrollment.
- Reside in the targeted geographic area, or plan to return to the area upon release from incarceration.
- Have been expelled from a school OR had juvenile or adult justice system contact; and
- Have one or more risk-factors associated with delinquent or criminal activity.

The U.S. Department of Labor awarded \$46,783,877.00 in grants to 14 organizations across 9 states in the fourth round of funding to support programs that provide job training and supportive services to justice-involved young people.
