

▶ Integrated Labor Inspection Cases System

(SICIT, Sistema Integrado de Casos de Inspección del Trabajo)

Integrated and Effective Management

It enables handling all the information related to labor inspection, and is implemented in the 40 Local Labor Representations.

SICIT's Main Characteristics

▶ Operates in all Local Representations.

▶ It is an important source for administrative management and statistics generation.

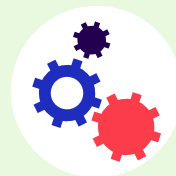

▶ Complies with the Dominican Republic Public Administration computer system policies and requirements.

▶ It is compatible with other Ministry of Labor and public institution databases.

▶ Ensures the labor inspection process initiation, management and control.

▶ Works as a tool for effective inspection management.

Main Objectives

▶ Improve:

▶ Access to information.

▶ Availability and collection of data on labor compliance and inspection activity.

▶ Resource utilization and use of the Ministry of Labor's technological platform.

Benefits

- ▶ It is very useful for the programming, management, and follow-up of the inspection process, for registration of all data collected in the process, and for generating statistical reports.

- ▶ It allows for the articulation with other systems of the Ministry of Labor and other public institutions.

- ▶ It is a user-friendly system for labor inspection personnel.

- ▶ Can be used online, available via the Internet, and accessed from a PC, tablet, cell phone, or both).

- ▶ All labor inspectors, local representatives, supervisors, and managers related to SICIT have been trained to use this tool.

- ▶ Officials received a handbook and audio-visual self-training material for using the system.

- ▶ **Providing a Better Service**
SICIT contributes to the technological modernization process being carried out by the Ministry of Labor to offer a more efficient service to workers, employers, and citizens in general across the country.
