2025 DEEOIC Webinar Series

The Division of Energy Employees Occupational Illness Compensation (DEEOIC) webinar series, which originated shortly after the COVID-19 pandemic started, has proven to be a successful means of engaging and informing DEEOIC stakeholders. As part of an initiative to enhance our stakeholders' webinar experience, a tentative schedule of topics for the 2025 webinar series has been created and is provided below. In response to stakeholder requests and survey responses collected by the DEEOIC Outreach & Customer Experience Unit, we will also begin recording the presentation portion of webinars in 2025. The recordings will be made available on the DEEOIC <u>Outreach and Events</u> page website shortly after each webinar. Because we will now be recording webinars and posting the recordings to our website, we will be updating and repeating several of our most requested and well attended webinar topics in 2025. These efforts align with DEEOIC's broader commitment to improving customer experience and responding to customer feedback.

Throughout the year, please monitor the <u>Outreach and Events</u> page for specific dates and registration links. Typically, the registration link is made available approximately two weeks before the scheduled webinar date. If you wish to receive email notifications when registrations open for these webinars, you can sign up on the <u>Program and Policy Updates via email</u> page.

If you have any questions, or would like to provide feedback or suggestions for future webinar topics, please email us at DEEOIC-Outreach@dol.gov

2025 Webinar Topics & Schedule		
<u>Month</u>	<u>Topic</u>	
January 2025 February 2025	Site Exposure Matrices Overview of Part E causation What is SEM? Navigating SEM Presumptive standards & SEM DEEOIC Partner Agency Webinar Series Part One: Former Worker Programs
