## Need Help?

Use the **inquiry form** <<https://epa.gov/brownfields/forms/brownfields-job-training-program-technical-assistance-inquiry-form>> to submit a question or technical assistance request.

Students of the Isles, Inc. Brownfields Job Training Program

## About the Brownfields Job Training Program

EPA's Brownfields Job Training Program provides technical assistance to help nonprofits, local governments, and other eligible organizations build local workforces to perform assessment, cleanup, or preparation of contaminated sites (including

brownfields) for reuse. Training programs funded by Brownfields Job Training Grants enable program graduates to obtain skills to secure full-time, sustainable employment in various aspects of hazardous substances, pollutants, contaminants, and petroleum products within the larger environmental field, including sustainable cleanup and reuse, and chemical safety. Training programs prioritize unemployed and under-employed residents of communities impacted by a variety of waste facilities, blighted properties, and contaminated sites.

EPA's Brownfields Job Training Program hosts periodic technical assistance webinars and professional learning calls for program applicants and recipients.

## Eligible Types of Training

All eligible training must have a direct connection to facilitating the inventory of brownfield sites, site assessments, remediation of brownfield sites, community involvement, or site preparation. EPA evaluates each Brownfields Job Training Grant application to determine the eligibility of proposed training courses. The following examples illustrate the types of training courses that Brownfields Job Training Program funds may be used to offer.

### Example Courses

- Brownfields hazardous waste training
- “Green Remediation” technologies
- Green infrastructure and stormwater management
- Emergency planning, preparedness, and response training for emergencies leading to contamination on brownfield sites
- Enhanced environmental health and safety related to site remediation

### Eligible Course List

For a more complete list of eligible training courses and examples of courses that are ineligible, visit [List of Eligible and Ineligible Brownfield Job Training Courses](#)

- Energy efficiency and alternative energy technologies <<https://epa.gov/brownfields/list-eligible-and-ineligible-brownfield-job-training-courses>>.
- Training in assessment, inventory, analysis, and remediation of brownfield sites
- Use of techniques and methods for cleanup of hazardous substances
- Awareness training in Environmental Stewardship and Environmental Justice
- Training in climate change mitigation and adaption
